

KEY REVEALS
HUGE BUILDING
PROGRAM PLANS

National Construction Council Lays Results of Exhaustive Research Before Hon. R. B. Bennett

Provision of cheap money at the present time in order that plans can be got ready for an early start would see Canada embarking on a \$500,000,000 construction program, the bulk of it undertaken by private concerns.

Of this amount \$63,830,000 would be utilized in Central and Northern Alberta. Edmonton's share of the program would be \$3,000,000.

The whole program hinges on Federal government action to provide the necessary credits at rates of interest in keeping with the times.

This is the considered opinion of the National Construction Council of Canada after a Dominion wide survey the most thorough and painstaking of its kind ever undertaken, and which took eighteen months to complete.

The National Construction Council of Canada is itself one of the most representative organizations in the Dominion, with leaders in every branch of construction activity enrolled.

It is made up of the following organizations: Royal Architectural Institute of Canada, Canadian Construction Association, Engineering Institute of Canada, Trades and Labor Congress of Canada, Canadian Lumbermen's Association, Brick Manufacturers' Association of Canada, The Canadian Ceramics Society, Asphalt Roofing Manufacturers of Canada, The National Clay Tile Association, Canadian Council of the International Society of Master Painters and Decorators, Canadian Founders and Metal Trade Association.

The survey, organized by the council, was undertaken by a committee, directed by a local regional committee.

STATE OF U.S.
NOW HANGS ON
NRA IS CLAIM

Vital Necessity Shown That Shadow of Revolution Be Moved

DENVER, Colo., Dec. 12.—President E. D. Roosevelt's NRA program must go through to a successful conclusion, otherwise the United States can look for a revolution, with a Fascist dictatorship in big business and violence on the left.

Such a revolution will be composed of thirty million embittered farmers, ten million unemployed, and ten million laborers and citizens who have lost their homes through mortgage foreclosures.

Sherwood Eddy, author, student, traveler and widely known student of world affairs, voiced this warning in Denver.

"As these people of the United States draw to the close of 1933 they will find that in small towns NRA is a failure," he said. "In cities and farm districts it is a 40 per cent success for NRA must be reorganized, otherwise."

Bullitt Presents His Credentials

MOSCOW, Dec. 12.—William C. Bullitt, United States ambassador to Russia, today presented his credentials to President Mikhail Kalinin. The American party were wearing coats and silk hats, the Russians ordinary every-day suits.

Soldiers Benefit By Not Forgotten Fund

Feature Merry Christmas Is Desirable Object of Bulletin

Any 'Tummy' to go? Any 'Tummy' to go? But it's not red and it's 'yes' when the drum begins to roll.

In his immortal poems, Rudyard Kipling taught not only the spirit and psychology of Private Thomas Atkins, but also pointed out the mental attitude of the great public towards him.

In those fatal years, 1914-1918, when the boys were flocking to the colors to serve overseas and to be killed on foreign fields, from western to the other disastrous.

They were on the "thin red line of heroes." They were lonely, they were tired, they were homesick, they were dispirited and gentlemen and they were killed.

In the military world of war, the war-weary soldier was the most important of all.

They were the "thin red line of heroes." They were lonely, they were tired, they were homesick, they were dispirited and gentlemen and they were killed.

ROCK, BETTER

HUGE BUILDING NOW AWAITING FEDERAL MOVE

Continued from Page 1
tee in Edmonton that committee consisted of the following men and organizations: J. B. Carwell, chairman; Alberta Architectural Association, W. G. Hickey, Canadian Manufacturers' Association, J. A. Brown, Edmonton Trades and Labor Council, A. Farnham, Engineering Institute of Alberta, R. M. Dineen.
The chairman of the local committee is Mr. Dineen, manager of the Standard Iron Works here.

Already the findings of the council have been laid before Hon. R. B. Bennett. In their submission to the prime minister, J. B. Carwell, chairman of the survey committee and president of the Edmonton Steel Co. of Hamilton, Ont., makes it plain that lower money is all that is needed to start Canada's industrial wheels rolling again.

FINANCING NEEDS IS LOOSER CREDIT
"The council's opinion is that the most pressing need is to provide some financial machinery and some financial aid to the government in which the federal government should be considered only as a stimulant to the private enterprise."

Where provincial government has extended the credit, it is believed that "the federal government should support the credit of the province where necessary."
"Municipal undertakings the council says it is feasible to give direct subsidies from the federal government to the provinces. This done the credit of the 'average municipality' would be improved entirely any new construction."

For private work, where the bulk of the big projects of construction would be, it is suggested that the government should provide "credit machinery operating Loan and Trust companies, whereby Federal government funds would be made available at attractively low rates of interest, providing the projects advanced stood up to the usual banking requirements."

"Personally we would rather see the credit of the state used in this direction than the construction of Federal works themselves, although the latter are equally necessary, says the memo to the prime minister."

It is pointed out that all present relief schemes are in part only relief for the unemployed, but the man who has the back-bone, the man who has the initiative, the man who has the initiative, is absolutely "out."

PRESENT RELIEF SCHEME EXTRA VACANT AND UNSOUND
"We are against the present scheme of dealing with unemployment as we are firmly convinced that it is economically unsound and a very expensive and unsound way of dealing with the situation, the council summing up of the situation."

That the construction program of the Dominion has been hampered by the tightening up of credit is shown in a table submitted to the Prime Minister which indicates that from a yearly volume of \$107,000,000 in 1929 it has dropped to the present time to a yearly rate of less than \$60,000,000.

Dealing with the benefits to unemployed if the construction industry is to be re-vitalized by the provision of cheap credits, the council is very explicit.

"From figures furnished by the Dominion Bureau of Statistics this industry employed in 1929 some 200,000 direct workers. From the same source we are given a figure of 20,000 as the number of indirect workers."

Named As Plotter In Ukraine

DR. ALFRED ROSENBERG
In an alleged plot to start an uprising against the Soviet regime in the Ukraine, Dr. Alfred Rosenberg, leader of the Ukrainian Committee, was named by Stanley Koster, head of the Ukrainian Committee, as being a plot to smuggle hundreds of Nazi agents into the Ukraine.

workers, or a total of 270,000. It is estimated that the industrial output in this industry on account of the far-reaching ramifications, he believes this figure of 70,000 to be a conservative estimate.

It is also stated that in almost every urban centre in Canada there is a serious housing shortage. The world's record for height in concrete building is held by V. S. Eveson, Soviet army aviator, who jumped from an altitude of 20,000 feet. He dropped 22,000 feet before opening his chute.

HOUSE OF LORDS MEETING WARNED BY EMPIRE BODY

Decline in Seapower Causes Concern — Unless Protection Afforded British Isles Could Not Last Six Months
LONDON, Dec. 13—A call for a bigger and better British navy was sounded yesterday at a meeting of the House of Lords. A resolution adopted expressed concern over the decline of the British navy in relation to those of other powers.

The world's record for height in concrete building is held by V. S. Eveson, Soviet army aviator, who jumped from an altitude of 20,000 feet. He dropped 22,000 feet before opening his chute.

Why Relief Costs Will Aggregate Staggering Total

Civil Taxpayers Have Contributed Cose To Million

SICK TRAPPER IS FLOWN OUT

Acting on their own responsibility while various government departments wrangled about rules and regulations Canadian Airways sent a plane piloted by Archie McCallum into the Hudson river on Tuesday and brought out Gunnar Aspar to McMurtry, where he is now in care of Dr. McCallum.

C. H. "Punch" Dickins, northern representative, said that McCallum took a risk on account of the fact that some overflow on Tuesday and brought out Gunnar Aspar to McMurtry, where he is now in care of Dr. McCallum.

Aspar has been sick for six weeks with an abscessed lung. No aid could reach him during the twelve-week season, and it was only by the devotion of Miss Lillian Black, Edmonton nurse visiting at the post, Dr. Harry Lewis, and Dr. McCallum, and last, but not least, Canadian Airways.

Aspar is being looked after for the time being at McMurtry. It is hoped to bring him on to Edmonton. W. R. "Hop" May, of Canadian Airways, was reported southbound from Great Bear Lake Tuesday to Edmonton with further coming out for Christmas. Aspar may be brought down in this plane.

Pilot Con. Farrell was reported southbound from Norman to Akivik with Christmas mail.

School Children Getting Too Much Homework: Trustee

Too much homework. Time something was done about it. These were declarations made by Trustee W. Walter Morrish at the public school board meeting Tuesday night. Those are sentiments that will touch the heart of every girl and boy.

"All kinds of kids are reporting that they work up to 12 o'clock at night," Dr. Morrish said. There is a general feeling that the children are being driven too hard."

Supt. G. A. McKee stated that the high school curriculum necessitated this heavy home study and the department of education was responsible.

"Start there," said Dr. Morrish.

No action was taken at the meeting but it was intimated further study would be given the matter.

Chautemps And McDonald To Confer

PARIS, Dec. 12.—A talk between Premier Camille Chautemps of France and Premier Ramsay MacDonald of Great Britain in an effort to determine the British stand in relation to Germany was considered today in diplomatic circles.

It was believed possible that such a conversation may follow the recent interviews between Lord Tyrrell, the British ambassador, and French Paul-Boncour, French foreign minister.

Officials Believe This Year's Costs Will Be Lower, Indicating That Unemployment Peak Is Passed.

For the past two years and ten months, from January 1, 1932, to October 31, 1933, Edmonton relief costs have amounted to the staggering sum of \$2,050,000. Of this amount \$1,000,000 has been paid by the Federal and Provincial governments under their agreement with the city, but \$1,050,000 has been paid by the taxpayers of Edmonton.

The relief costs have meant an additional year added to the tax rate of the city's share, some \$700,000 has been capitalized, the remaining \$1,050,000 coming from revenue. The \$700,000 has been met by borrowing money from the Federal government at five per cent.

It is estimated that there are 12,000 people on the city relief rolls at present time, counting single men, heads of families and their dependents. The total number of people on the rolls will reach 15,000 at the end of the year.

If this prediction is fulfilled the total cost may show another increase.

In 1931 the total amount spent on relief was \$1,137,371.91 of which the city paid \$123,350.04 and the government, provincial and federal, \$1,014,021.87.

In 1932 the city's share amounted to \$363,960.28 with the government paying \$650,259.99 of the total bill of \$1,014,220.27.

For the first ten months of the present year the city's share of relief costs is \$200,000.00 while the government has paid out \$352,406.28, the total bill for the year being \$552,406.28.

Administration costs in 1931 were \$142,352.22. In 1932 they rose to \$42,285.76. For the first ten months of this year they have reached the \$30,482.88 mark.

For the past two years \$250,000 a year of the relief costs have been capitalized while in 1931 \$200,000 was capitalized, making the \$250,000 total for the two years and ten months.

Although officials declare that it is not safe to make a prediction as to "anything might happen," they believe that this year's relief costs will be a shade lower than last year's when the end of the year is reached. In any event they do not believe that last year's total of \$552,406.28 will be exceeded.

Gleaned From Today's News

I Saw Today

R. W. Deane, divisional freight agent for the C.P.R., with headquarters in Calgary, was a city visitor on Wednesday.

The special meeting of city council to discuss the 1934 land and property assessment will be held on Thursday at 8:30 p.m. and was presided over by Alderman J. C. Clark.

H. R. Matheson, A.P.I. general passenger agent from Winnipeg, and C. D. Brown, district moving agent from Calgary, were visiting on the city Wednesday on a routine business trip.

M. C. Culler, 1063, Avenue, whose husband has been a millman for eighteen years and is now in charge of a unit of seven drivers, knows just what it means to get up every morning in the winter of winter or summer, at three o'clock and prepare breakfast for her husband before he leaves.

The milkman and his wife seldom enjoy an evening of recreation, as they have to arise too early in the morning to get their milk. This will give them a chance to go to the store together once in a while and to enjoy a more regular home life. We can have a few friends in for an evening without having to worry about my husband having to get his milk.

ALL ROUND BENEFIT

It was felt that the earlier hour worked a hardship not only on the drivers of the agency but also on the housewives. Light sleepers in apartment houses and hotel districts were also awakened by the milk deliveries and it is believed by the city council that not only will the new hours better the working conditions of the drivers but also will work an all round benefit to the community generally.

CONSUMERS BENEFIT

Advantages of this innovation are being pointed out by the city council. In the first place, early morning milk is immediately available. With the starting hour delayed as it will be, customers will be able to get their milk earlier in the morning than when it reaches the doorstep.

There is also the added advantage of not being disturbed in the small hours by the milkman knocking up the door. Frequently the milkman comes to the door with the milk pails to put out a cream bucket, but while still engaged in his morning duties, the can can be secured without disturbing the sleepers. It is considered also that it will be economically beneficial to the house. Under the present system the milkman comes to the door twice for harnessing and feeding, but when the new regulations take effect, he will come only once, with his three hours later.

BETTER WORKING HOURS

The drivers of the many delivery agencies are in a position to change with hearty appreciation the new hours of the morning with the prospect of working up at three a.m. daily eliminated entirely from their lives.

It is considered also that it will be economically beneficial to the house. Under the present system the milkman comes to the door twice for harnessing and feeding, but when the new regulations take effect, he will come only once, with his three hours later.

SYSTEM PLEASANT IN EAST

Delightful feeling has been expressed in both Regina and Saskatoon as to the new hours of the morning. The plan that the Edmonton drivers are inaugurating. The movement of opening up the new service will prove of considerable benefit to the city and the dairies.

"Three o'clock in the morning" is a phrase that is not new to the city.

It is considered also that it will be economically beneficial to the house. Under the present system the milkman comes to the door twice for harnessing and feeding, but when the new regulations take effect, he will come only once, with his three hours later.

SYSTEM PLEASANT IN EAST

Delightful feeling has been expressed in both Regina and Saskatoon as to the new hours of the morning. The plan that the Edmonton drivers are inaugurating. The movement of opening up the new service will prove of considerable benefit to the city and the dairies.

"Three o'clock in the morning" is a phrase that is not new to the city.

Edmonton, Alberta—Wednesday, Dec. 13, 1933

Gleaned From Today's News

I Saw Today

R. W. Deane, divisional freight agent for the C.P.R., with headquarters in Calgary, was a city visitor on Wednesday.

The special meeting of city council to discuss the 1934 land and property assessment will be held on Thursday at 8:30 p.m. and was presided over by Alderman J. C. Clark.

H. R. Matheson, A.P.I. general passenger agent from Winnipeg, and C. D. Brown, district moving agent from Calgary, were visiting on the city Wednesday on a routine business trip.

M. C. Culler, 1063, Avenue, whose husband has been a millman for eighteen years and is now in charge of a unit of seven drivers, knows just what it means to get up every morning in the winter of winter or summer, at three o'clock and prepare breakfast for her husband before he leaves.

The milkman and his wife seldom enjoy an evening of recreation, as they have to arise too early in the morning to get their milk. This will give them a chance to go to the store together once in a while and to enjoy a more regular home life. We can have a few friends in for an evening without having to worry about my husband having to get his milk.

ALL ROUND BENEFIT

It was felt that the earlier hour worked a hardship not only on the drivers of the agency but also on the housewives. Light sleepers in apartment houses and hotel districts were also awakened by the milk deliveries and it is believed by the city council that not only will the new hours better the working conditions of the drivers but also will work an all round benefit to the community generally.

CONSUMERS BENEFIT

Advantages of this innovation are being pointed out by the city council. In the first place, early morning milk is immediately available. With the starting hour delayed as it will be, customers will be able to get their milk earlier in the morning than when it reaches the doorstep.

There is also the added advantage of not being disturbed in the small hours by the milkman knocking up the door. Frequently the milkman comes to the door with the milk pails to put out a cream bucket, but while still engaged in his morning duties, the can can be secured without disturbing the sleepers. It is considered also that it will be economically beneficial to the house. Under the present system the milkman comes to the door twice for harnessing and feeding, but when the new regulations take effect, he will come only once, with his three hours later.

BETTER WORKING HOURS

The drivers of the many delivery agencies are in a position to change with hearty appreciation the new hours of the morning with the prospect of working up at three a.m. daily eliminated entirely from their lives.

It is considered also that it will be economically beneficial to the house. Under the present system the milkman comes to the door twice for harnessing and feeding, but when the new regulations take effect, he will come only once, with his three hours later.

OUR BOARDING HOUSE - - By Ahern

"Well," Santa said, "I guess that we can all get busy as can be right over in the little shop where the boy gets his new model along the floor. Course, they are only about a mile, so you needn't be afraid."

"But even if they were alive, I see a lot of toy machines. I'll run them on the floor."

(READ THE STORY, THEN COLOR THE PICTURE)

would be afraid, 'cause I've had lots of cat and dog pets," shouted Santa. "This is fun."

"Just lead us to your little shop. We'll work away, and will not stop until the task is finished. I am anxious to begin!"

"For quite a time they had no rest. The royalists all did their best to see that every pet worked (and they were a good many)."

"One cat was cute as it could be. I've met to cuddle up to me. And then I turned a little boy. You should have seen it run!"

"One dog I had barked in my ear," cried Santa. "I'll find me with the, 'meow' I forget, but just a toy. I made it bark, myself."

"All right," said Santa. "Wind them up, and let them go if they work all right. Pretend you're at a corner. You can use a semaphore."

"The semaphore was brought right in. The 'toy' machine heard Santa say, 'All right, look out for traffic.' Then he equaled on the ground."

"Soon toy machines were whizzing up and down, and Santa said, 'Look! I can turn a switch and stop each car, no matter where its bound.'"

"(Santa takes charge of the toy street drill in the next story.)"

The hand, as referred to in measurement, is four inches.

ONE-DAY EVENT IN STAPLES AND YARD GOODS

Half Price Clearance! Fancy Linens

Almost incredible that we could assemble another sensational grouping of linens—smart, gift pieces from all over the world—to clear at such a reduction. Yet this grouping represents hundreds and hundreds of dollars. The variety is fascinating, and of course the quality delightful. **HALF PRICE, piece or set, 10c to \$19.50**

at 8:30

Half Price—Luxurious Comforters!

Down-filled comforters—and we mean real goose-breast down, too, of a finer quality. The coverings are of broadecord taffetas, rich and colorful. Or of flower-strewn, lustrous materials, with panels in harmonizing tones. Piped edges. 72x78 in. size. Reg. \$29.50. **HALF PRICE \$14.75**

at 8:30

At 9:30 o'Clock Irish Embroidered Pillowcases

Just half the usual price, for these snappy cases. First time they've been offered, as far as we know, at less than a dollar. Hemstitched borders. Several designs for choice. **PAIR, 50c**

At 9:30 o'Clock Pastel Jacquard Towels

Big towels. Smart towels. All-over pastel tones, in the sort of new, clever designs you see in the magazines. First quality. About 22x12 inches. Good value at 65c. In gift boxes. **EACH, 39c**

At 9:30 o'Clock Down-Filled Comforters

Plumply filled with clean-as-clean feather down. Pretty comforters—and luxuriously warm. Coverings are of fine cambric—patterned in lovely flower colorings, and paneled in safety. Piped edges. 60x72 inches. **EACH, \$3.95**

At 10:30 o'Clock New Tubfast Prints

Some of the famous Magog Fastest Fabrics—that means they're guaranteed color fast, you know. The new season designs—giving you the new spring motifs and colorings. What a smart gift—this dress length at the **SPECIAL PRICE, 3 yds. 55c**

At 10:30 o'Clock Large Flannelette Blankets

Less than our replacement cost, for these blankets. Thursday, **FIRST QUALITY**—in the famous "Albion" brand. Full 70x84 inch size. Bordered color. **PAIR, \$1.95**

At 10:30 o'Clock Large White Wool Blankets

Four pounds of a fine white wool—in blankets all of 72x90 inches in size. Striped borders—whipped in singles. A former special value at \$6.95 pair. **EACH, \$2.95**

—EATON'S, Second Floor

SEVEN HALF-HOUR

A wonderful wagon for the child. City—strong and easy to handle, and well finished for a child's playtoy. **\$4.95**

Butterfly Game
A toy gun, and two butterfly arrows to be shot from the gun at a target. SPECIAL **25c**

An Aeroplane
Many a little girl will think Christmas not half fun, without an aeroplane. These are big and strong, and have wheels so that really go special. **19c**

EATON'S Toyland, Second Floor

Fine Coats To Clear

At a Reduction Amazing, No Less

Such a coat as you thought you couldn't afford this year. Now within the reach of the modest income ("see our foot-note, if you're not convinced.")

Up-to-the-minute in every detail of styling: furs such as sable, mink, French seal, minkskin or jay mink—in capulets, wide shoulders, jabots, and the like. Smart—very!

Chamois to the waist—silk crepe lined—interlined. A complete size range, to 42's. Imported wool fabrics. —Also Available on Deferred Payment Terms.

—Coats, Second Floor

Misses' Party Dresses

ON SALE **\$1.95**
AT 10:30

A "sister" store wires that three successive groupings of frocks like these disappeared in double quick time. And you won't wonder, when you see the dresses—it's a SALE SENSATION!

Crepes—satiny materials—metallic touches at the necklines, or sheer net and lace—mostly short sleeves, and very long. Lovely colors: pastel, bright or dark. Sizes 14 to 20. SHOP AT 10:30! —Dresses, Second Floor

Shop Promptly
